Company Profile

History

SubNet Services Ltd is a UK registered company holding ISO 9001 accreditation by UKAS. We have Offices and Competency Training and Assessment facilities in the UK, Manila and Subic in the Philippines.

SubNet Services Ltd are members of IMCA, FOA, AWS and ASNT offering recruitment, consultancy, competency training and assessment.

SubNet Services Ltd have been awarded UKAS ISO 9001 by the United Kingdom Accreditation Scheme to cover our recruitment, training, assessment and our e-learning courses..

We already held JAS – ANZ ISO 9001 for our quality management system jointly for Australia, New Zealand plus the Asian area. SubNet Services Ltd uses a network of offices connected 24 hrs a day by our IT infrastructure around the world to ensure full coverage to the Industries.

We supply and manage Recruitment, Consultancy, HR and Training services to the major industry players. You can outsource part or all of your requirements to us or allow us to implement a turnkey outsourced solution.

Services

Recruitment & HR Outsourcing

Our high tech HR network allows us to source and supply experienced KEY personnel to major clients within any industry. See our impressive clients list. Clients are already using us to source competent staff for Computer IT, Oilfield, Sub Sea, Engineering, Design and other projects. Our key personnel keep us updated with their availability, location and qualifications to enable us to supply competent staff to major clients at very short notice at any world location. We have in house IT teams also for clients who wish to outsource some projects.

Training

We are an IMCA training and recruitment member and with our skills in the Offshore Oilfield, IT and other Industries. We are able to offer competence training to our clients personnel in areas such as they have required. For example skills and conversion courses for engineering staff to familiarize them with oilfield or other industry equipment. Reps, Subsea, Rov etc..

We can also train sourced personnel to your competency requirements to allow you to spread your own experienced crews further.

We are a AWS accredited welding test facility.
We train IT call centre personnel.
We train and certify Fiber Optic Technicians
Our ROV Oilfield Pilots course is recognised world wide.
And much more

Consultancy

Our consultancy services include:
Client Side Representation, Project Management, Risk Assessment and Auditing to many requirements including IMCA design audits, Installation, Trials, Inspection, Survey and more.
